

Harvest Billing System

Release 20 Functionality

June 23, 2010

The main focus of this Release is:

1. Queries
2. Scale Returns
3. Maintenance

The following is a list of the fixes included in HBS Release 20:

Function/Subsystem	Summary
Queries Report retrieval	Ministry and Industry user should no longer receive a System Error when trying to access a report via the link in the report request email.
Queries Piece Scale Invoice Weight Scale Invoice	The footer on the invoices have been modified to read "...and make payment to any Ministry of Finance office..." instead of "...and make payment to any Ministry of Provincial Revenue office..." and the HST number has been added.
Queries Billing History Scaling History	The Mark Monthly Billing History (P431) and Mark Monthly Scaling History (P441) were modified to permit selection of history records by Billing type: Normal, Cruise-Based, Waste, and/or Beachcomb.
Queries Invoices and Statements	The product descriptions have been added to Compiled Sample Statements, Ratio Statements, Weight Scale Invoices, and Weight Scale Volume Statements, to display 'Logs', 'Woodchips', or 'Hogged Tree Material' (bio-fuel), or any other product description for weighed products.
Queries Invoices and Statements	Repaired HBS to remove false 'Statement does not exist' messages that sometimes occur when a user clicks on a Statement number on a Summary Scale Return screen.
Scale Returns Log Detail Update Screens	Modified the Save button on log detail update screens (P558/P658) so that valid logs are saved to the database even if other logs have validation errors.

Harvest Billing System

Release 20 Functionality

June 23, 2010

Function/Subsystem	Summary
Scale Returns Cruise Based billing	HBS has been modified to allow for Mountain Pine Beetle Cruise Based billing.
Scale Returns Site Name Site Location	HBS has been modified to accommodate changes made to the field length in the Scale Control System for the Site Name and Site Location.
Scale Returns Search for Scale Returns	Enhancement to the Search for a Set of Returns: Detail screen (P046) to provide the capability to search for scale returns by volume assessment type (i.e. scale-based, or cruise-based). Also enhance validations on the Search for a Set of Returns: Summary screen (P045) to ensure valid 'return-category' requests.
Scale Returns Issued Summaries	Repaired HBS so that when an Issued Summary is viewed online, it does not update the Update Timestamp field in the Forest Invoice table.
Stratum Advisor	Revised B2042 calculations for Stratum and Population tables to accommodate populations where default ratio statements have been issued for one or more strata.
Stratum Advisor	Enhanced Stratum Advisor to support weight scaling bio-fuel products.
Billing Default Ratios	HBS has been modified to allow default ratios to be used for non-replaceable tenures.

Harvest Billing System
Release 20 Functionality
June 23, 2010

Function/Subsystem	Summary
User Services	Enhancement made to screen P010, HBS Enrolment Request, in User Services, so that it includes a new mandatory field (BCeID) for new Forest Industry Users, and for new Other Industry Users, to ensure that the user has a BCeID before requesting an HBS UserID.
Rating Waste Assessment Edit	Repaired the Waste Assessment edit WBIF20 so that it handles a timber mark with quotes.
Mark Billed Client Table maintenance	Resolved Mark Billed Client problems caused by duplicated "client link" data entries which were causing duplicate entries on the Piece Scale Billing Summary Report(R421), Mark Monthly Billing History Report (R431) and Mark Monthly Scaling History Report (R441)..
