

Harvest Billing System

Release 24 Summary of Functionality

June 07 2013

The focus of this Release is:

1. Maintenance of previous tickets and recent releases

The following is a list of enhancements included in HBS Release 24:

Scale Returns	The bulk change function (P601) has been modified so that users can now perform the bulk Re-edit on returns in NTI status
Time Stamps	The Entry timestamp is no longer being overwritten by Update timestamp when updating the Cruise Based Billing Profile.
PS Summary	A 'CBSS02 - District of Scale Site conflicts with District of Timber Mark' error is no longer displayed if a Timber Mark on an Area Based return is modified and the new Timber Mark is associated to a different district.
Stratum Advisor	A fix to the Standard Deviation for Sub-samples has been done.
Scale Returns	A "DB Monitor - inconsistent document" email is no longer produced and sent to the Billing Business Support mailbox when a Submitted Summary Returns is HELD and the version number is incremented.
