

What's New for Version 2.0 Phase 1 - October 2004

1) Allow industry users to have only 1 BCeID for multiple authorized client numbers. To initiate this functionality, each user must inform the ECAS Help Desk which BCeID will be used as the primary one.

2) changes to the Acknowledgements Screen

- a) allow for multiple licensee email addresses to be entered
- b) change wording on 3 certify sections

3) Tombstone - add a distinctive box to separate visually on the screen

4) Allow District staff to update Appraisal Effective Date and Expiry Dates

5) changes to BCTS

- a) enhance edit rules for radio buttons
- b) change default to fixed from adjustable for adjustment method
- c) disable bonus bid update on first pass

6) changes to Inbox

- a) do not include BCTS information when completing a Copy function
- b) do not include grade percent information when completing a Copy function for Coast
- c) add new 'Copy' audit event in audit history to show originating ECAS id

7) changes to Report Submission - allow reporting by timber mark (and effective date)

8) changes to XML upload - provide more meaningful labels on buttons, additional text on screen to define process

9) change the order of the Navigation buttons and drop down menus for Coast and Interior

10) Interior Changes

- a) Cruise/Tree to Truck - change submit validation for Partial cut %
- b) Log Transportation/Administration - refine lookup for Woodlot Road Management Costing
- c) Other Development - change submit validations
- d) Reference - remove Woodlot rate adjustment selection
- e) Reference - allow update of timber mark
- f) Tabular Roads - default first 3 columns to previous value entered

11) Coast Changes

- a) prevent Coast CVP appraisals after February 29, 2004
- b) b) Reference - allow update of timber mark
