

Welcome to

Harvest Billing System

Training 2013

Agenda

- Roles and Responsibilities
- Finding Scale Returns
- Correcting Scale Returns
- Anomaly Management
- **LUNCH**
- General HBS Issues
- Queries and Reports
- Waste / HBS Billing
- Cruise / Area Based HBS Billing

HBS Industry Roles

- Industry User Administrator
- Industry User
- Industry Site Administrator
- Industry Scaler
- Industry Sample Plan Administrator
- Industry Document Receiver
- Industry Cruise Based Administrator

HBS Relationships

A Forest Industry
Client Can Own one

Forest Act, Section 97 (1)

Responsible parties

Scale return

97 (1) Each of

- (a) the owner of a scale site,
- (b) the operator of a scale site,
- (c) the person whose timber is scaled under this Part, and
- (d) the person who performs the scale

must ensure that

- (e) the scale details are recorded in a form approved by the minister and retained in that form at the scale site, and
- (f) a scale return in the form approved by the minister is completed and delivered within the prescribed time to the person whose timber is scaled and to a person designated by the minister.

(2) If the scale return referred to in subsection (1) (f) is not completed and delivered to a person designated under subsection (1), within the time prescribed for the purpose of that subsection, the person must pay to the government a penalty in the amount prescribed for the purpose of this section.

(3) For the purpose of section 131 the penalty imposed by subsection (2) is money payable to the government in respect of the timber.

Scaling Regulation: “Prescribed Time”

Scale return submission timing and penalty

- 11** (1) For the purposes of section 97 (1) of the Act, the prescribed time is 14 days after the scale return is completed in the form approved by the minister.
- (2) For the purposes of section 97 (2) of the Act, a person listed in section 97 (1) (a) to (d) of the Act who does not comply with the timing requirements established under subsection (1) of this section must pay a penalty to the government in the following amount:
- (a) if no stumpage is payable, \$25;
 - (b) if stumpage is payable and
 - (i) the scale return is delivered fewer than 31 days after the due date, \$25,
 - (ii) the scale return is delivered more than 30 days after the due date but fewer than 61 days after the due date, \$50, or
 - (iii) the scale return is not delivered 61 days after the due date, \$100 plus \$2 for each day following the 61 days that the scale return is not delivered to a maximum of \$200;
 - (c) if the scale return is based on the method of scaling timber described in section 5 (1) (b) of this regulation, \$100.
- (3) The minister may waive a penalty under subsection (2) if satisfied that
- (a) the delay in the delivery of the scale return was caused by circumstances beyond the control of the person who did not comply with the timing requirements established under subsection (1), or
 - (b) all other scale returns the person referred to in paragraph (a) was required to submit during the preceding year, starting on the day before the scale return was delivered, were delivered in accordance with the timing requirements established under subsection (1).

[en. B.C. Reg. 386/2008; am. B.C. Reg. 89/2011, Sch. s. 9.]

Forest Act, Section 97 (7): Reference to Electronic Submission

(c) the person whose timber is scaled under this Part, and

(d) the person who performs the scale

must ensure that the check scale details are incorporated in the scale return submitted under subsection (1) (e).

(7) If the minister estimates that the annual volume of timber scaled at a scale site will exceed the prescribed volume, he or she may order the owner or operator of the scale site to enter into an arrangement to deliver, by electronic means to the ministry, the scale returns required under this section.

Scaling Regulation:

Maximum Volume Before Electronic Submission is Required

Annual volume at which electronic scale return may be required

12 For the purpose of section 97 (7) of the Act, the prescribed annual volume is 500 m³.

[en. B.C. Reg. 69/2004, s. (b).]

Electronic Transactions Act

Requirement to provide and retain originals

- 8 (1) A requirement under law that a person provide an original record is satisfied by the provision of the record in electronic form if
- (a) there exists a reliable assurance as to the integrity of the record in electronic form, and
 - (b) the record in electronic form is accessible by the person to whom it is provided and is capable of being retained by that person in a manner usable for subsequent reference.
- (2) A requirement under law that a person retain an original record is satisfied by the retention of the record in electronic form if there exists a reliable assurance as to the integrity of the record.
- (3) For the purposes of subsections (1) and (2),
- (a) the criterion for assessing integrity is whether the record has remained complete and unaltered, apart from the introduction of changes that arise in the normal course of communication, storage and display, and
 - (b) the standard of reliability required must be assessed in view of the purpose for which the record was created and other relevant circumstances.

Industry Responsibilities

Ensure all scale data is submitted, accepted and corrected in HBS

Retrieve electronic issued documents

Ensure scale site and users are set up correctly in HBS

Industry User Responsibilities

- Manage user profiles (IUA)
- Ensure all returns are delivered and correct (ISA)
- Propose and Monitor Sample Plans for population (IPA)
- Ensure all HBS documents are received (IDR)
- Ensure all cruise and area based returns are delivered and correct (ICA)

Help Screen re checking xml transmissions

Glossary Index Search What's New Print This Topic csa GO Ministry of Forests and Range

9.1.2 Receive XML Detail Transmissions (B1012)

An XML file contains one or more scale returns. When B1012 is executed, it stores the 'filename' and the file 'last modified date' in the database and generates a Transmission ID. It then validates that the file meets the configuration specifications (i.e., that the computer program code can read and interpret the data) and applies format edits to the scale returns.

- If the file meets the configuration specifications, the transmission status is set to "CSA" (Completed Satisfactorily).
- If the file does not meet the configuration specifications, the transmission status is set to "CUS" (Completed Unsatisfactorily). ~~the returns in the file are rejected and the batch process selects the next XML file for processing.~~

To determine if a file has produced scale returns inside HBS, select the XML File Transmissions hyperlink on the customized Home page. For further instructions refer to [Submit Detail Data](#).

How to find Scale Returns in HBS

You can find a single detail return if you know:

- ✓ Detail Document Number
- ✓ Scale Site & Weigh Slip Number
- ✓ Scaler Licence & Return Number

1. From the HBS Home page, select the **Scale Returns** tab.
2. From the Scale Return menu screen, select **Search for Scale Return: A Single Return: Detail** option.
3. Choose a search option, enter your search criteria and select

You can find a Single Summary Scale Return in HBS if you know:

- ✔ Summary Document Number
- ✔ Statement Number

1. From the HBS Home page, select the **Scale Returns** tab.
2. From the Scale Return menu screen, select **Search for Scale Return: A Single Return: Summary** option.
3. Enter the SDN or Statement No. and select

Search for Summary Scale Return

Choose 1 of
these options:

Specific Document Identifier

★ Please enter one of the Summary Scale Return Selection Criteria

Summary Document Number:

Statement No:

You can locate a set of scale returns by using HBS search options to find:

- ✓ Returns in Submitted Batches (Summary or Detail)
- ✓ A Set of Returns (Summary or Detail)
- ✓ Returns in Batches & Transmissions

Scale Return Menu

Search for Scale Return

- A Single Return: **Summary; Detail**
- Returns in Submitted Batches: **Summary; Detail**
- A Set of Returns: **Summary; Detail**

Search for Batches and Transmissions

- Submitted Batches: **Summary; Detail**
- Detail Scale Transmissions: **XML**

Find a Set of Detail Scale Returns

1. From the HBS Home page, select the **Scale Returns** tab.
2. From the Scale Return menu screen, select **Search for Scale Return: A Set of Returns: Detail** option.
3. Define your search criteria and select  

The screenshot shows a web form titled "General Criteria" with a "Sort By" dropdown. The form is divided into several sections for defining search criteria:

- Detail Document Number:** A text input field.
- Return Type:** Radio buttons for Log Tallies, Weigh Slips (selected), Sample Tallies, Arrival Ledgers, Departure Ledgers, and Log and Sample Tallies.
- Version Status:** Checkboxes for ACC, DSF, INC, AWP, RDY, ERR, HLD, NTI, LCK, ISS, CAN, and DEL. Buttons for "Check All Statuses" and "Clear All Statuses" are present.
- Error Code:** A text input field and a checkbox for "Invert Selection (i.e. all errors except that specified)".
- Event Type:** A dropdown menu currently set to "All".
- Range of Dates (yyyymmdd):** Radio buttons for Scale Date (selected) and Received Date, each with "From" and "To (optional)" text input fields.
- Scale Site:** Radio buttons for All Sites, Sites in Region/District (with a dropdown menu), Single Site, and Sites in Associated Districts.
- Pop/Strat/Year (P, P/Y or P/S/Y):** Three text input fields.
- Timber Mark:** Checkboxes for Scale-Based (selected) and Cruise-Based. Radio buttons for All Marks, Marks in Region/District (with a dropdown menu), Single Mark, and Marks in Associated Districts. A "Cut Block" text input field is also present.
- Primary Scaler Licence:** A text input field.
- Range of Numbers:** Radio buttons for None (selected), Return Number, Load Number, Weigh Slip, Transport ID, and LDS Number, each with "From" and "To (optional)" text input fields.
- Client Association:** A dropdown menu set to "All".
- Client No/Loc:** Two text input fields and a "Client Lookup" button.

A "Submit" button is located at the bottom right of the form. A small note at the very bottom states: "Only active versions will be returned".

HBS

Correcting Errors

Correcting Errors

You can correct scale return errors:

- Prior to issuing
- After issuing, by requesting a:
 - Cancel
 - Cancel and Replace With Changes
 - Cancel and Replace Without Changes

How should you correct errors?

- Online, using HBS screens
- Correct, re-compile and re-submit to HBS (XML Transmission) from your company system

Correcting Issued Scale Returns

You must notify the Regional Billing section if:

- Changes are required to scale returns with a status of “Issued”
- A sample load has been lost or replaced

If you make a change to any of the following fields, a ministry official must approve the change:

Scale Date	Scaler Licence Code	Site Code	Weigh Slip Number
Scaled Timber Brand	Weight	Log Details	Load Description Slip
Pop/Str/Year	Return Number	Timber Mark	Load Arrival Number
Cut Block

Scale Event Anomalies

Types of HBS Anomalies

- **Gaps** – scale return arrives in HBS without a matching predecessor or successor
- **Duplicates** – repeat of scale return or weigh slip number
- **Mismatches** – scale return arrives with a mismatch with associated counterpart

Anomalies

- All harvested timber must be scaled and invoices or statements must be **issued**
- HBS is designed to receive scale data based on sequential numbering and expects scale returns, weight slips and load arrivals to be created in numeric order
- Scale Event Anomaly tools help both Ministry and Industry users ensure scaling information is accurate and complete

10.1 Harvest Reports

This query (By Date of Invoice (Billing History) or By Date of Scale (Scaling History)) outputs a list of billing or scaling history using a variety of search parameters. The query will only return information for a date range that does not exceed 12 months. The following are required fields for the search criteria:

- *Billing Period,*
- At least one of: *File Type, Forest File ID* or *Timber Mark,*
- *Region / District of Harvest, Region/District of Scale,* or
- *Licensee Client No / Location.*

The following screens are used to create and configure this report:

- [Create Mark Monthly Billing/ Scaling History Report \(P431\)](#)
- [Mark Monthly Billing/ Scaling History Report Configuration \(P432\)](#)

11.2.9 Weigh Slips Without Matching Red Tag Scale Returns (P952)

This screen displays the results of the search for weigh slips without red tag scale returns events entered in screen P911.

- To view the associated scale return, select the [hyperlink](#) in the "Weigh Slip" column.
- To clear an anomaly on the appropriate row, select the 'Clear' button in the 'Clear?' column. The Confirm Anomaly Clear screen, P954, will be displayed. To return to the List of Weigh Slips Without Matching Red Tag Scale Returns screen without clearing the anomaly click the No button. To clear the anomaly, click the Yes button. The List of Weigh Slips Without Matching Red Tag Scale Returns screen, P952, is re-displayed. The status of the anomaly is now 'User-Cleared'

To view the details of the User-cleared anomaly, click on the 'User-Cleared' link the Anomaly Status column. The User Cleared Anomaly Details screen, P955, is displayed listing the details of the anomaly including the date and the ID of the user who cleared the anomaly

- To print the list of anomalies, select **Print**. The selected list will open in Adobe reader, available for printing.
- To return to the Scale Control Anomaly search page, use the navigation line provided.

4.2 Roles

The following is a description of the five user group roles in HBS. Customized home pages exist for some roles. For more information on the HBS Home page, see [How to Use HBS](#)

4.2.1 Public Role

- Public Users:** Public Users are unregistered users of HBS. Members of the Forest Industry who have a client number with the Ministry of Forests can make a request to become a registered user of HBS through the public HBS website.

4.2.2 Forest Industry Roles

- Industry User Administrator:** Client User Administrators can enter requests for user ID's or role changes for members of their company, and can submit updates for existing user accounts. A Client User Administrator may also establish associations for users within their company to scale sites.
- Industry User:** Members of the Forest Industry can view their own scale return data, view profiles (Client, Scale Site, Scaler, Population, Mark Holder, and Delivery) rates, sampling plans and request scale return and issued document reports.
- Industry Scaler:** Industry scalers can submit detail scale returns (including special forest products) to HBS directly or through industry systems. Scalers can update their own scale returns prior to invoicing without approval, and can execute a cancel, cancel and replace or replacement of a scale return of their own scale returns. An Industry Scaler can receive notification of detail scale returns held in error and data submission status.
- Industry Site Administrator:** Industry Site Administrators receive notification of detail scale returns held in error and data submission status. An Industry Site Administrator can update a ledger, submit

Arrival Ledgers

7.3.5 Arrival or Departure Ledgers

These screens are used to add, update and view arrival or departure ledgers online:

- [7.3.5.1 Add Ledger Entry \(P700\)](#)
- [7.3.5.2 View an Arrival or Departure Ledger Entry \(P702\)](#)
- [7.3.5.3 Update an Arrival or Departure Ledger \(P703\)](#)

Saving the arrival ledger entry header, P700, validates data the user entered in the Add screen. When the arrival ledger entry complete, the user can print, save, add, discard or release the arrival ledger for processing.

There are seven types of Arrival Ledgers: Primary Scale, Scale Before, SB4 Rescale, To Site Deck, From Site Deck, Remote Sample and Remote Red Tag. There is one type of Departure Ledger: Departure. There are different business and system rules for completing each return type.

The Detail Document Number is initially blank. When the Add button is selected, a unique Detail Document Number is assigned to the return and the initial version number is one.

To update an Arrival or Departure Ledger entry, the user searches for the ledger, places it in a held state, updates the header and then releases the ledger to NTI status. Updates to a ledger will be validated in the same manner as adding a new ledger, using both format and cross-reference validation checks on release.

Search: “To Site Deck”

Ministry of Forests and Range

Type in the word(s) to search for:

[7.3.1 Add a Piece Scale Detail Return Online](#)
[7.3.5 Arrival or Departure Ledgers](#)

7.3.1 Add a Piece Scale Detail Return Online

These screens allow a user to add a piece scale detail return online:

- [Add a Piece Scale Detail Return P550](#)
- [Update a Piece Scale Detail Return P553](#)
- [Update Piece Scale Log Details P558](#)
- [Update Piece Scale Log Defects P559](#)

Saving the return header, P550, validates data the user entered in the Add screen. When the header data is saved, the Add screen changes to the Update screen. The user adds the remaining return information by selecting the Log Details and Log Defects button. When the scale return is complete, the user must return to the header Update screen, P550, to review and release the return for invoicing.

There are seven piece scale return types in HBS: Primary Scale, From Site Deck, Local Red Tag, Remote Red Tag, Piece Check Scale, SB4 Rescale and Company Use. There are different business and system rules for completing each return type.

The transitional nature of a web-based application allows HBS to present related screens in different ways, depending on the data that is entered. For example, if the user selects scale method “Gross” in the header, the volume column in the log details screen will match as gross. If the user selects scale method “Net” in the header, the volume column in the log details screen will match as net.

7.1.8 Search for Submitted Detail Batches (P024)

This screen allows the user to search for scale returns in batches of detail scale data based on user-defined criteria.

Users with edit authority will be taken to the edit version of the scale return screen, P553, P603, P653 or P753. On an edit screen, fields are open for the user to update data. Users with view authority on the scale return will be taken to screens P552, P602, P652, P702 and P752. The same distinction of view versus edit depends on a user's authority levels within Log Details, Details, and Log Defects. For more information on [Security and Roles](#) refer to that section of the manual.

Steps

1. Start at HBS Home Page.
2. Choose the *Scale Returns* tab.
3. Select Search for **Batches** > **Submitted Batches** > **Detail**. The Search for Submitted Detail Batches screen, P024, will display.
4. Select a "Return Type".
5. If desired, enter additional general criteria.
6. Enter a "Batches Received Between" date range.
7. Select **Submit**. The List of Submitted Detail Scale Data Batches (XML) screen, P027, will display.

Definition: **Car Stakes**

Special Forest Product code CS – round stakes used as side supports for railroad flat cars. Car stakes often have one squared end to fit the side pockets build into the car deck and the remainder of the stake has the bark left on. Car stakes are a finished product. It is now more common to use sawn timbers as railroad car stakes. These sawn timbers are not classified as car stakes. Dimensions: approx. 10 to 15cm in diameter and 3 to 5m in length. The diameter at any place on the piece must not exceed 15cm. Scaling Method: Piece Sampling or Stacked.
