

Field Scale Deck ID for Override Rules

New in MR14, there are now two classes of override rules:

- Field Scale Deck ID not provided:
Regular Override Rules apply. [this has not changed]
- Field Scale Deck ID provided:
Override Rule will apply only to scale with the specified Field Scale Deck ID.

The Field Scale Deck ID is a new field that provides the ability for the timber from the field scaled deck to be rated differently than a regular load from the same mark.

Once the Field Scale Deck ID has been associated with the rule and is in place (active), during the rating process the override rule will be included in the rating logic.

For more information on creating override rules, see the [Billing Management Manual](#)

Please see the next page for screen shots of where this new field appears.

The Field Scale Deck ID appears in two places:

1. **When Searching** (Search for Override Rate Rules, P200)

Field Scale rating rules are specified by timber mark, either by "All Decks" or by a single deck, scale dates and processing dates.

Callouts:
- Selects rules that don't apply to field scale decks. (points to Rules for All Decks)
- Selects rules that apply to any field scale decks for this mark. (points to Field Scale Deck Rules)
- Selects rules that apply to a single field scale deck for this mark. (points to Rules for a Single Deck)

2. **When Adding a new Date Rule** (Add Override Date Rule, P203):

The field appears below Timber Mark and will be automatically populated if it was included in the search on Search for Override Rates screen, P200.
