

2007 WASTE SYSTEM

TRAINING

(www.for.gov.bc.ca/hva/scale/index.htm)

Version 1.3
January, 2007

Prepared by J. Wai
Waste Assessments Policy Forester
Revenue Branch
Ministry of Forests and Range

Topics

1. Annual Plan
2. Data Entries
3. Parent Block/Multi Marks
4. Forest District Users
5. Forest Region Users
6. Reports

Annual Plan - Screen Navigation

Submitting an Annual Plan

On the top Annual Plan menu, click 'create annual plan'.

501

Enter data, click Create Plan. If successful, note annual plan ID # (each licensee in a forest district should only use one annual plan ID for each year's surveys and oculars) Annual Plan status - Draft.

The three reporting unit options now appear on the screen. A licensee may choose to use any one or all three of the reporting unit options.

Aggregate Option	Enter Dispersed and Accumulated CVs (50-130%) Click 'save'. Repeat for add on RU. Each RU must have more than one block.
------------------	---

Annual Plan - Screen Navigation

Cutblock
Option

Enter Dispersed and Accumulated CVs (50-130%)
Click 'save'.
Each RU must have only one block.
Repeat for additional RU.

Ocular
Estimate
Option

Click 'Create New'.
Each RU may have one or more blocks.

Next to the created RU, click 'Details' to go to 101. Repeat to complete for all RUs.

101

Enter block header data (licence no., cp, block, TM, area), click 'save new'.

Repeat for additional block. Note, for cutblock option only one block is allowed for each RU.

Note RU status - 'Draft', Block status - 'Draft'.

When block header data have been completed for all RUs on the annual plan, go to 501.

Annual Plan - Screen Navigation

501

On screen top under Annual Plan, click 'submit'.
Check box on 303, click submit.

For the Coast forest Region users, the Waste Coordinator in the forest district must approve the annual plan before field data can be accepted by the system.

For the Interior users, the annual plan is instantly approved. You may proceed to enter field data.

Once the annual plan is approved, the plan and the RU statuses will change from 'draft' to 'approved'. The block status will remain as 'draft'.

New blocks and RUs may be added anytime after the annual plan is approved.

'Submit Successful' message will appear. Note Plan status changed from 'draft' to 'submitted'.

Data Entries - Screen Navigation

Entering Field Data and Submitting Blocks

501

Next to RU ID#, click 'Details'.

101

Note RU status - Approved. Block status - draft.

Either click on 'Details' on the block that has been entered or enter a new block.

102

Enter block details, click 'save' and proceed to enter stratum data.

Must have at least one stratum record before submitting a block.

Click save after each stratum record entry, repeat for additional stratum.

Ensure the total stratum areas equal to the block net area. If not, you won't be able to submit a block.

Data Entries - Screen Navigation

Click Details on the saved stratum to go to waste 205 screen.

205

Enter data, click 'save' after each entry. When completed, click 'Back'.

102

After completing all details for all stratum, click 'Back'.

101

When ready to submit a block, click 'submit'.

Check box on waste 303, click 'submit'.

If successful, the block status will change from 'draft' to 'submitted' and the 'approve and reject' buttons will appear.

If the annual plan is approved, the status of the Plan will change from 'Submitted' to 'Approved'. All the RUs that are submitted with the plan will have the statuses changed from 'Draft' to 'Approved'.

How to Approve Blocks

From the Reporting Unit menu on top, click on Inbox/Reporting Unit search. Input years, forest district. On reporting unit

status, select 'approved'. Leave licensee blank to search for all licensees.

Click 'search' and the following screen will come on.

The screenshot shows the 'WASTE System' web application in Internet Explorer. The browser address bar shows 'http://testextranet5.for.gov.bc.ca/waste/'. The application has a navigation bar with 'Annual Plan', 'Reporting Unit', and 'Reports' tabs. The 'Reporting Unit' tab is active, and the page title is 'Waste001 - Inbox/Reporting Unit Search'. The form contains the following fields:

- From:** 2004 (Year)
- To:** 2004 (Year)
- Forest District:** DCK - Chilliwack Forest Distri
- Licensee:** (blank)
- Licence No:** (blank)
- Cutting Permit:** (blank)
- Block:** (blank)
- Timber Mark:** (blank)
- Reporting Unit Status:** APP - Approved

There are 'Search' and 'Clear' buttons at the bottom of the form. Below the form is a table with the following headers:

Reporting Unit ID	Plan Year	Licensee	Reporting Unit Status	Method Type
-------------------	-----------	----------	-----------------------	-------------

The table body is currently empty. At the bottom of the page, there is a footer with links for 'Feedback', 'Disclaimer', 'Privacy', and 'Copyright', and the text 'MINISTRY OF FORESTS'. The Windows taskbar at the bottom shows the Start button and several open applications: 'Forest Service Intranet - ...', 'Inbox - Microsoft Outlook', 'WASTE System - In...', and 'Microsoft Word - Sec9w...'. The system clock shows '11:02 AM'.

How to Approve Blocks

Click on 'Details' of the reporting unit to go to Waste 101 screen which appears as follows:

How to Approve Blocks

(continued from previous page)

If there are standing trees left on the block, ensure the standing tree volumes are reported. Alternately you can go to the top Report menu and print the Area Summary Report or the Block Type Summary Report. The standing tree strata are indicated as either STRE or STRS on these reports.

If the block is subject to field audit, go to the top report menu, request and print a copy of the plot piece listing report.

When checking or auditing is done, click 'Approve' or 'Reject' to either approve or reject the block. If the block is approved, the screen will be changed to as next.

The block status will be changed from 'Submitted' to 'Approved'. However if the block were to be rejected, the block status will be changed to 'rejected' and the licensee needs to make corrections and resubmit the block, as indicated next.

How to Approve Blocks

This is an example of the rejected block, the licensee will have to make corrections and resubmit this block.

For this particular reporting unit, there are two blocks. The forest district has only approved one block and the other block has not been submitted. To process waste billing on the approved block, make a note of the RU#, and the licence, cp, and block numbers. Go to the

report menu on top and click 'Reports'. Enter all required data for the block. On the report drop list, click FS 702, as next.

There are three specific functions need to be done for waste billing, and they are:

(Continued on next page)

Forest Region Users

(continued from previous page)

1. Enter the species, grade, avoidable, volume data from Waste 702 to HBS.

This part is done as normal until a bridge is built in HBS to capture these data automatically. Then, this step will be eliminated.

2. If the WMRF (Waste Monetary Reduction Factor) on the FS 702 is 0.0000, code stumpage rates on the FS 702 following the procedures indicated on the applicable Waste benchmark worksheet (see Appendix A.5 on the new Waste Procedures Manual).

If the WMRF on the FS 702 is above 0.0000, then you need to request the 12-month average stumpage rate for the timber mark from the HBS. Use the PLC (primary logging completion date) indicated on the FS 702 as the end date, the start date will be one-year before this date. Once this is done, follow the procedures laid out on the applicable waste benchmark worksheet to code rates on the FS 702.

3. Once step 2 is done, enter the derived stumpage rates into HBS for the block.

Forest Region Users

When the billing functions are completed for the block, go back to screen 101 and click 'Complete' for the block which just had been

processed for waste billing, and the screen will appear as next.
