Appendix 2 VQO Inspection Form

BRITISH COLUMBIA — Ministry of Forests and Range

Compliance & Enforcement
VQO Inspection Form

5.2.2 Site Information (Office)

Forest District: SOUTH ISLAND
Viewpoint Location: VIEWPOINT 1
Licensee: TSESHAHT
Block Location: ALBERNI INLET
Licence No. FLTC A81582 P No ____ Block 164211
Results Opening No. ____

5.2.3 FSP & Objective Information (Office)

Established VQO: PR
Date of Establishment: DEC. 15, 2005
Source Document: GAR 7.2 ORDER

Did Licensee adopt established VQO as result?
☑ Yes ☐ No If yes proceed with Inspection.

If No determine what was approved and if it is measurable and verifiable?

5.3.1 Viewpoint (Field)

GPS Longitude: 124 49 08.8
GPS Latitude: 49 10. 49.4
Viewing Direction: 200
Viewing Distance: 2.8 km
Elevation (m): 0

5.3.2 Photography (Field)

Photo ID No's: 409 - 416, 417-23
Viewpoint Importance: (Low) 1 2 (3) 4 5 (High)Digital
Viewpoint Description: Near Lone Tree Point

5.3.3 Assess Basic VQC (Field)

Alterations meet which Basic VQC definition? Circle where in the range for that VQC:

Notes: Extremely easy to see
Large apparent scale
some angular characteristics

Basic VQC: P R PR M MM

5.3.4 Design Observations (Field)

Design Elements:	G (-1)	M (0)	P (+1)
Response to visual force lines		✓	
Borrows from natural character			✓
Edge treatments incorporated		✓	
Distance from the viewpoint		✓	
Position on the landform			✓
Total Design			2

5.4.4 Partial Cut Alterations

Partial cutting
% removed ____

Average tree height (m) ____

Clearcut equivalent ____% alteration as read from table 3.
Record this value on line 5.4.2a

5.4.2 Assess Initial VQC (Office)

a) % of landform altered by openings (NEW): 16.6
b) % of landform in access roads (outside openings): 0
c) % non-veg contribution of older openings: 0

$X = (a+b+c)$ ____ % alteration 16.6 **Initial VQC:** M

5.3.3 Assess Adjusted VQC (Office)

D) Impact of roads, side cast, etc. (within openings)
☐ none ☑ subordinate ☐ significant ☐ dominant Adj. Factor +1
e) Tree retention: ☐ Good ☑ Moderate ☐ Poor Adj. Factor -1
f) Design (enter total from 2.2.4 above) Adj. Factor 2

Total adjustment: $Y = (d+e+f)$ Adj. Total 2

Calculate Adjusted % alteration: $X*(1 + 0.14*Y)$ = 21.25

5.5.1 Determining VQO rating on landform by comparing Basic VQC with Adjusted VQC

☒ **Clearly not met**
Definition ***not achieved*** % alt. in excess of VQO range
☐ **Not met**
Definition ***not achieved*** % alteration within VQO range

☐ **In-conclusive**
Definition on class boundary, % alt. in excess of VQO range.

☐ **Met**
Definition achieved % alteration in excess of VQO range
☐ **Well met**
Definition achieved % alteration well within VQO range

5.5.2 Rationale

Adjusted VQC: P R PR M MM

Adjusted %alt:	0	1.5	4	7	12	18	24	30

Inspected By: LLOYD F. DAVIES, RPF

Signature: Lloyd F. Davies

Date of Field Inspection: JULY 22, 2011
