Northern Caribou - UWR U-7-026 - Fort St. James District

Draft General Wildlife Measures

1. Primary forest activities must not occur within the northern caribou high elevation winter range, except as provided in GWM 2.

2.GWM 1 does not apply where:

a)guyline anchors and tailholds are required to facilitate timber harvesting adjacent to the northern caribou high elevation winter range; or,
b)trees are felled in accordance with section 2(3) of the Forest Planning and Practices Regulation; and,
c)trees felled for the purposes in (a) and (b) that fall within the designated northern caribou high elevation winter range are retained on-site.

3.Primary forest activities must not result in the construction of roads or trails within 100 metres of a northern caribou high elevation winter range, except as provided in GWM 2(a).

4.Primary forest activities that occur within northern caribou high elevation specified area polygons SA32, SA33, SA34, SA35, SA36, SA37, SA38, SA39, SA40, SA41, SA42, SA43, SA44, SA45, SA46, and within early seral moose winter range potential will limit the production of preferred winter moose browse to not more than 5% ±3% cover.
