Access Instructions

Access notes: From the Junction of Hwy 20 and 97, travel south 14.5kms and turn left on the Horsefly Road. Travel 5kms on the Horsefly road and turn left onto the Likely Road. Proceed 80.1 kms and cross the bridge over the Quesnel River in Likely. Go straight at the junction onto the Keithly Creek Road and travel 2.8 kms where the Keithly Creek road turns into the Cariboo River FSR, stay left at 2.8km. Turn left at 17km (from Likely) onto the Kangaroo FSR. Stay right at 8km on the Kangaroo FSR. Turn right off the Kangaroo FSR at 12.5km onto the Rollie Lake Road. Travel 8 kms on the Rollie Lake Road stay left or straight and proceed to 10km. ATV access past 10km for 1km. Polygon is on the left: Confirmed S.Drango July 17/16

Comments

All allocated trees must be planted on this block and entire block must be planted with allocated trees. **Boot screef required to remove herbaceous vegetation and loose litter**

PU #1: Fill-Plant SX PSB 512A (80%) and Pli PSB 412A 1+0 (20%). (800 sph sown) Target density of 2000 ws/ha. Target spacing is 2.4 m with a minimum spacing of 1.0 m. Use minimum spacing to achieve target density and optimum planting microsite selection. Respect naturals of good form and vigour. Mineral soil is preferred but organic soils, compacted duff and smearable rotten wood is also acceptable. Planting in litter layer is not acceptable. Use naturally occurring raised microsites where they occur. Plant down slope of obstacles (i.e. stumps and rocks) where available to minimize snow creep damage. Avoid planting in dense patches of alder and rhododendron where possible. When an area of thick rhododendron must be planted then the rhododendron must be screefed off of the planting spot. Pine must be planted in open areas, away from competing vegetation. GMH
