Access Instructions

From Williams Lake, proceed west on HWY 20 to Riske Creek and turn left onto the 2000 Road. Proceed for 33 km to km 2033 and turn left onto the 2200 Road. Proceed for 20 km and turn left onto the 2800 Road. Proceed for 57 km and turn right onto the Gaspard-Dash FSR. Proceed approx. 4.5 km. Block 4 and the access spur are to the right (north).

Comments

This block was scheduled for 2020 plant. It was not planted. Kept same prescription. RG delay is 2025-08-03. MS March 2021. PU 1: Plant 55% Pli PSB 410 and 45% Sx PSB 412A to a target density of 2000 stems/ ha with target spacing of 2.4 m and minimum spacing of 1.8 m. Ignore existing naturals. Plant into mineral soil or black greasy organic soil in the wetter areas, creating a pocket screef where needed. Plant on elevated or raised microsites and beside stumps on wetter ground. Target obstacles (stumps, logs, rocks) where present for frost protection. Do not plant spruce in depressional frost pockets. Use minimum spacing to ensure optimal microsites are utilized and to maintain target densities.
