Comments

THIS IS AN UNPLANTED PORTION FROM LAST YEAR AND HAS NOT BEEN SOWED FOR.
PU #1: Plant 75% Pli, 25% Fd or some combination. Both species are preferred. Whatever appropriate seedlot and size that we have available.
Plant to a final density of 1800 sph with ideal spacing of 2.50 metres. 1200 SPH are allocated to this block. Pli can be planted in the open but Fdi should be planted within 20 cm of a standing tree or log, on the north side. Space off naturals, which are clumpy. Create a 10x10 cm screef into mineral soil when planting into vegetation.

The MITD for this block is 1.8 m. KG
