Access Instructions

From Williams Lake, travel West along Highway 20. At Riske Creek, turn left onto the 2000 Road. Travel to 2094.5 and turn left the 9000 Road. Travel 8.7 Km, at junction, turn left onto the 9100 Road. Travel for 3.1 Km and turn left. Continue approximately 100 metres and quad approx 1400 metres to block 7 to access large Northern portion of the block. To access south smaller portion of the block turn left at 3.8 km on the 9100 road and turn left. At this point drive if it is very dry or quad due to the wet road approximately 900m to access the block. updated June 2019 KS

Comments

This block has been changed to be planted in 2022 instead of 2023 due to overflow trees. We will need to finish planting the rest of this block in 2023 if it is not fully planted and find a home for the trees that were originally sown for this block in 2021. June KS.

Plant Pli PSB 410 (100%). Plant to a target density of 2000 stems/ha with target spacing of 2.4 m and minimum spacing of 1.8 m. Ignore all naturalsand residual. Plant to dripline of existing residuals. To reduce frost damage, obstacle plant within 30cm of stumps and coarse woody debris. Plant into mineral soil, boot screening is required. Use minimum spacing to ensure optimal microsites are utilized and to maintain target densities where required. KS
