

Fill plant to boost stocking after 2021 mortality. Prescription taken from original and survey recommendations. Survey recommends Sx 415 stock. MK 08/12/22

Treatment Prescription: Raw Plant PU 1 with 10/90 Pli/Sx mix to a target of 1800 sph at 2.5m spacing. Estimated plantable spots are 1100sph. Plant vacant burn piles. Avoid drip lines of any over-head live trees. Space off of naturals of good form, vigour, free of disease and that are as tall as or taller than the planting stock. There are some areas(steps or terraces) that resulted from harvesting systems. Please ensure these areas are planted and not confused with the roads as they are included in the NAR. If applicable in areas where the duff/grass sod is thicker a 15x15 cm boot or shovel screef, to the smear - able organic layer on top of the mineral soil, is required. Please do not space off of any BI and Sx advanced regeneration of POOR form and vigour.
