PU 1 Treatment Prescription: Raw plant PU with an 80/20 Sx/Pli mix at 2000 sph at 2.4 m spacing. Note, minimum spacing less than 2.0 metres is allowed to meet the target of 2000 sph due to slash and other planting obstacles. Place one tea bag per tree in the hole with the root plug. Avoid drip lines of all over-head live trees. Target naturally raised microsites in wetter areas; in thicker duff or grass sod a 15x15 cm boot or shovel screef to the smear - able organic layer on top of the mineral soil is required. Space off of naturals of good form, vigour, free of disease and that are as tall or taller than planting stock. Note, this block is steep with slopes of 20 to 60%.
