Planting Map

BCTS
BC Timber Sales

PU 1 Treatment Prescription: Raw plant PU with a 90/10 Sx/Pli mix at 2000 sph at 2.4 m spacing. Note, minimum spacing less than 2.0 metres is allowed to meet the target of 2000 sph due to slash and other planting obstacles. Place one tea bag per tree in the hole with the root plug. Avoid drip lines of all over-head live trees. Target naturally raised microsites in wetter areas; in thicker duff or grass sod a 15x15 cm boot or shovel screef to the smear - able organic layer on top of the mineral soil is required. Ghost all Pli Residuals. Space off of naturals of good form, vigour, free of disease and that are as tall or taller than planting stock. Note, this block is steep with slopes of 30 to 55%. The lower portion of the block is very rocky. Also note that the in-block roads and high lead spar trails have been deactivated and logs put across the trails and roads.
