WORKER ALERTS

Safety Concerns:
N/A

Leave Tree Specifications:
CCRES - Target Leave Trees: Retain 95% of Deciduous greater than 17.4 cm dbh. Although none were tallied in the cruise, leave these trees if operationally feasible where encountered. Retain 95% of live Douglas- fir greater than 62.4cm dbh. Fisher Habitat. The cruise comp indicates that there are Sx stems >39cm DBH. Retain a maximum of 31 Sx stems with rust brooms. According to the cruise no At or Act that meet the minimum diameter requirements for fisher denning or resting. All deciduous stems are to be retained regardless of DBH. The cruise indicates there are Fd stems > 67.4cm DBH that have been reserved for denning. Target leave trees might be unevenly distributed across the block. Exceptional circumstances: Target leave Trees can be felled when necessary for incidental falling, blowdown removal, or safety/operational reasons. Where operationally feasible, leave understorey trees (poles having >50% live crown, saplings, and regeneration). The preference is for understorey leave trees to be free from insects, disease and defects and be left in groups of 3 or more where possible.

Riparian Areas:
TW9AW-1-NCW - UC - NCW is not within the harvest area of the block and has been retained in a WTRA.

Access Instructions

From Kamloops head North on Hwy 5N. 12 km north of Little Fort turn left onto Roundtop FSR (RR#26). Follow Roundtop for 8.9 km and turn right onto the 8000 FSR. Follow the 8000 FSR for an additional 6.7 km and turn left onto KA10184.01. Follow KA10184.01 for 4.4 km (Keeping left at 1.1 km) and turn right onto KA10184.03. Follow for 1.6 km and the block will be located to the North East.
