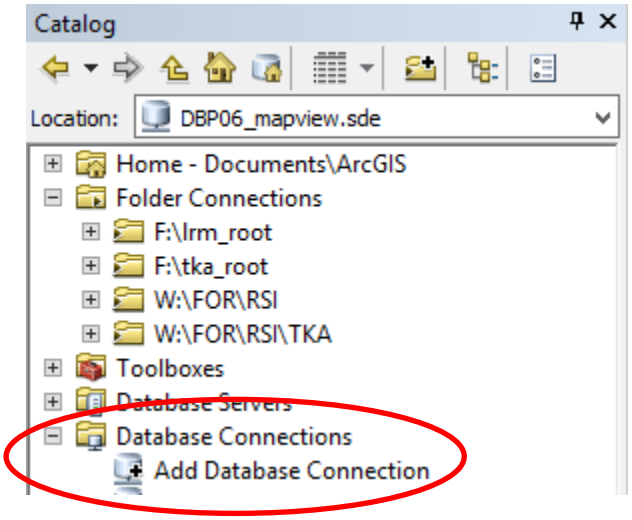
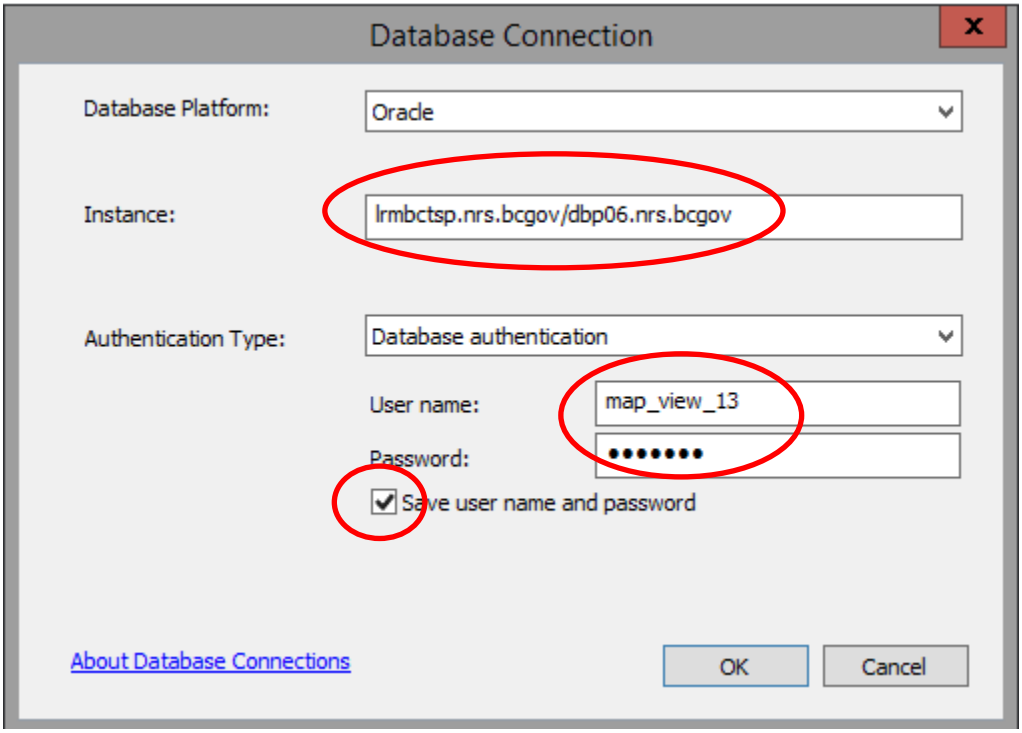
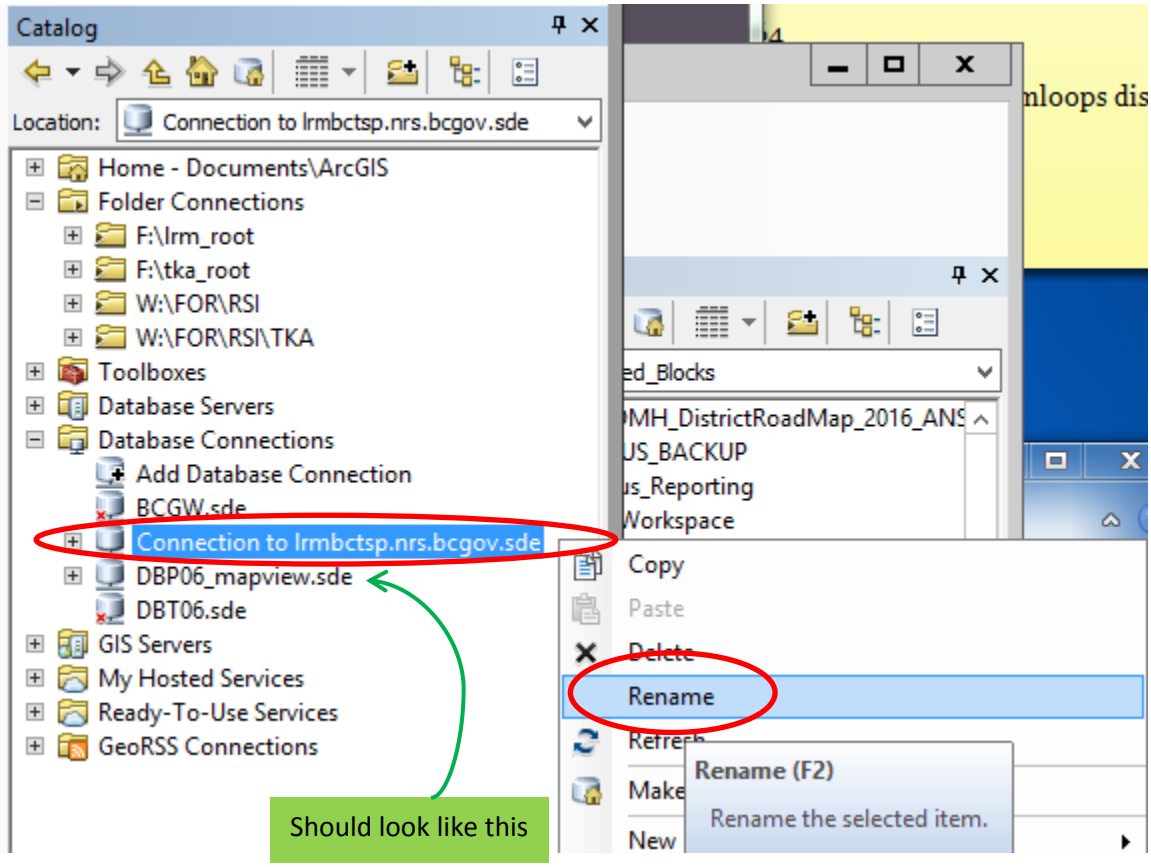
Adding a Database Connection for Running Tools

Step 1: From the Catalog window in LRM or ArcMap navigate to Database Connections and double click Add Database Connection



Step 2: In the Database Connection Pop-up enter the information as seen below. Password is 'unlimit'. Make sure Save user name and password is checked





Step 3: When you press OK on step 2 you will see a new connection called 'Connection to lrmbctsp.nrs.bcgov.sde'. You need to right click on that connection and rename to DBP06_mapview
