

CUTBLOCK AND ROAD FIRST NATIONS CONSULTATION DUE DILIGENCE

Date of Report: June 21, 2018

Consultation File: 20180122 First Nations Consultation

1. Background on the Development

60 Day First Nations Consultation period for Kootenay Lake Field Team running from January 22nd, 2018 to March 22nd, 2018. Development consists of timber sales scheduled in years 2018 to 2023 of the Kootenay Lake 5 year Development Plan. See appendix 1 for a summary of communications and a table of proposed blocks and roads.

2. Recommendations

Background:

BCTS has Cultural Heritage Review (CHR) contracts with Okanagan and Penticton Bands. With these CHR contracts there is significant engagement. Based on past discussions with PIB and OKIB, they are using the Operating Plan Referral to identify blocks which they want to review as part of the CHR contract in the upcoming year.

A work plan for upcoming CHR reviews was received from the Okanagan Band (Penticton and Okanagan tend to defer to one or the other for CHR reviews) on April 23rd, 2018. It is anticipated CHR reviews will take place this field season and beyond subject to the timing of development schedule of blocks in the 5 year plan and coordinated in conjunction with BCTS' new Consultation Officer (Planning Forester).

BCTS has an ongoing working relationship with the Ktunaxa Nation Council and Lower Kootenay Band and is actively working with them on pre-harvest and post-harvest field assessments for those areas of interest in the Hall-Bohan, Anchor Creek, and Hawkins Creek Operating Areas

Strength of Claim:

Strength of Claim assessments are only necessary for blocks or roads where First Nations identifies a specific concern through the Operating Plan. Where the First Nation is using the Operating Plan as a vehicle to identify work assignments for their upcoming CHR contract, we will not do strength of claim assessment on these areas unless the field

reviews identify an issue that warrants accommodation (other than block boundary or retention area adjustments).

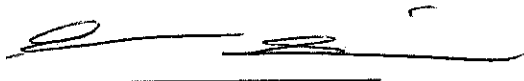

No specific concerns were identified by First Nations, and therefore, no strength of claim assessments have been completed for the blocks and roads under this referral.

Consultation:

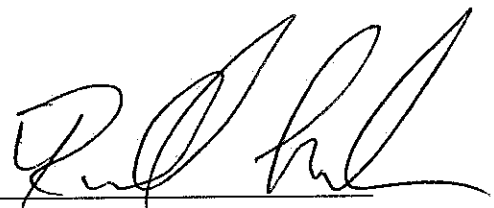

No responses or concerns were received that directly pertain to roads or blocks contained in this Referral. I believe that our obligation to share information and consult with First Nations has been addressed.

Any further issues raised by First Nations related to the development in this Operating Plan will be promptly addressed.

Recommend that BCTS has fulfilled its First Nations Consultation requirements regarding this referral.

Sean Slimmon, RPF. Planning Forester
Date: June 21st, 2018

Russ Laroche RPF. Timber Sales Manager
Date: June 21st, 2018
