Thanks Ed. The additions from Anna are what I needed. Yes, a VIA was undertaken by myself and all is good and it meets PR.

Thanks,
Richard

Subject: RE: TA0654 Kokanee - Collaboration Assessment

Hi Richard,

I had our new planner Anna look at adjacent licenses (see bellow). Looks like everything else is covered off.

I don't know too much about this TSL and noticed that the two Blks are in a visual polygon of PR, was a VIA done for them?

Thanks,

Ed Hadikin, RPF

Subject: Re: TA0654 Kokanee - Collaboration Assessment

Hi Ed,

What Richard has written looks good to me. All that needs to be included is the forest licensees that we share K10-West Arm with. That includes: Cooper Creek Cedar, Kalesnikoff, Woodlot 1458, and Woodlot 1670. All were included in the referral establishing transparency in our development plans and ensuring communication regarding shared landscape level values.

For future reference the list of shared LUs can be found in the files named "shared_LUs" in the following folder: K:\Kootenay_Lake_Field_Team\Planning\12500-50_Analysis\Landscape_Level_Assessments

Cheers,

Anna

Hi Anna,

Can you look into this for me or send me the link that has a list of the licensees and agreement holders?

Thanks,

Subject: TA0654 Kokanee - Collaboration Assessment

Hi Ed,

I'm hoping that you (or a delegate) can review what I've written below, fill in the blanks (red), add or alter as you see fit, and send back to me for to serve as the collaboration assessment for TA0654. I have drafted most of the needed information below based on my prepared site plans and support document, but what I can't verify is how you have referred and are co-managing shared landscape level values with other forest licensees and agreement holders (if applicable), as required under FSP 4.5.1, to ensure that the objective set by government will be met.

TSL# TA0654 Block 1 (WAW-018) and Block 2 (WAW-017)

WADF Landscape Level Assessment was completed 20170511

Referral associated with this LLA was 20180122 (but is also sometimes named 20170511, as attached, to correlate to the LLA)

Proposal is within in Sitkum-WADF operating area, Landscape Unit K10 – West Arm and is shared with the following forest license and agreement holders:

- xxxxxx **Cooper Creek Cedar, Kalesnikoff, Woodlot 1458, and Woodlot 1670**

BCTS has provided planning information, offered to exchange information, collaborated and coordinated with each licence or agreement holder, consistent with FSP Section 4.5.1.

To the best of BCTS's knowledge, this TSL should not impact the other licensees ability to exercise their tenure rights and or meet the results and strategies within their approved FSP.

1.Old and Mature Forest – *Old is being managed by OGMA's and this proposal is not within an OGMA .(However, the BCTS Construct Kokanee8500 FSR RoW, which is being built to harvest block 2, overlapped 0.25 ha of OGMA. The OGMA overlap is addressed in the Support Document associated with this road.) There is a Mature requirement where it overlaps the ICHdw. Mature is met as per the 20170511 Landscape Level Assessment.*

2.Connectivity Corridors – *Proposal is within a Connectivity Corridor. Management of Connectivity corridors meets the requirements of KBHLPO objectives relating to Old and Mature Forest Grizzly Bear Habitat as per the 20170511 Landscape Level Assessment.*

3.Landscape Level Patch Size Distribution – *Proposal is not greater than 40ha NAR, each block individually.*

4.Ungulate Winter Range – *Proposal is not within an Ungulate Winter Range*

5.Fish Habitat in Fisheries Sensitive Watersheds – *Proposal is not within a Fisheries Sensitive Watershed.*

6.Water in Community Watersheds – *Proposal is not within a Community Watershed.*

Thanks,
Richard
