1.5 RIPARIAN ASSESSMENT						
Block	Riparian I.D. and Class	RMA	SU	Width (m)	BA or SPH Retained	Comments (Indicate if in a Community Watershed)
11	NCD 1	RRZ	1	10	596 (100%)	Riparian reserve zone, 100% retention, no harvesting
11	NCD 1	RMZ	1	20	285 (50%)	Retention strategy for NCD 1 RMZ will be 285 SPH (50% of 596 SPH). The strategy is to retain 50% of all stems of all species in all diameter classes. Retain all non-merchantable stems where there is no conflict with harvesting activities.
Management Strategies:						
There is one NCD within this cutblock and it has been flagged down the center with Watercourse flagging. Retention strategy for NCD 1 RMZ will be 285 SPH (50% of 596 SPH). The strategy is to retain 50% of all stems of all species in all diameter classes. Retain all non-merchantable stems where there is no conflict with harvesting activities.						

Safety Highlights:

- Snags scattered throughout the block.
- Slopes >35% are scattered throughout the block and specialized steep slope equipment or harvest methods may be required.

Leave Tree Specifications:

- SU 1
- Layer 1 trees: Retain, where available, all live conifers >/= 52.5 cm dbh
 - Retain all PyPw and deciduous
 - Layer 2, 3 and 4 trees:
Reserve where practicable, small patches of saplings and non-merchantable poles that exhibit good form and vigor.

Harvest / Operational Constraints:

- Limit machine use on slopes as per WorkSafe BC OHS regulation Part 26-16 (slope limitations). This map shows areas of the block with slopes >35%.

COURSE WOODY DEBRIS MANAGEMENT STRATEGY INFORMATION
<ul style="list-style-type: none">Large snags, >35cm may be stubbed and left on site for CWD. Retain existing CWD that is already on the ground prior to harvest. Avoid placing large CWD in slash piles. Trees felled in WTRA's for safety concerns are to be left.
