Coarse Woody Debris Requirements:
Leave one pile per hectare distributed across the block. Piles should be located greater than 15 to 20 meters from the block boundary; near riparian features and other locations containing suitable habitat trees. Each pile will be approximately three meters in height and two meters in width.

Leave Tree Specifications:
Where available leave a minimum of 12-24 sph of merchantable deciduous trees evenly distributed across the block. Trees may be left in clumps of 1-3 stems and / or patches of 20+ stems where understory, brush, and non-commercial species are present. Concentrate stems around riparian areas where available. Harvest inspections conducted by an BCTS representative will assess and document availability of appropriate stems to meet the specified retention requirements *Retain Balsam (Subalpine Fir) where operationally achievable.

Riparian Features

ID	Class	Comments
R1-S6	S6	The RMZ is retained outside the block boundary. A crossing is required.

10084 Harvest Constraints

- This block is located within a mapped Caribou Herd Range. To minimize ground disturbance, winter harvest with frozen snow covered ground conditions. Limit herbicide use. Prescribe road deactivation and visual buffers to minimize potential external pressure on caribou populations. No lichens were found during development. Pockets of subalpine fir regeneration are present; retain all understory regeneration where operationally feasible and safe to do so.
- Harvesting within the Areas of Special Concern is scheduled to occur under winter conditions with snowpack to prevent ground disturbance or via reaching in with the machinery and leaving tree stumps intact.

Access Instructions

From Fort St John, head north on HWY97N for 76km. Turn left onto Upper Halfway Road. Travel 54km (eventually turning into Halfway Graham Road). Turn Right, after the bridge, onto Simpson Road and continue for 15.8km. Turn left and travel on R104090A (10-014-01) for 2km, then make a slight left onto R21928A (A95526-10052-A). The proposed road TA1295-10084-02 is found after 355m. After 1.4km on the R21928A (A95526-10052-A), turn left onto A95526-10052-01. The proposed road TA1295-10403-A if found after 315m.
