10403 Safety Concerns
Maintain natural drainages.
No tree-felling activities will occur from May 25 to July 23 of each year due to migratory birds in timber type 18. Timber type 19 does not have any timing restrictions. Chance find and stop work procedures apply.
Slope >35% are found at cruise plots 44 and 49. Utilize caution in this areas.
Fall away from external WTPs, riparian features, and the block boundary.

10403 Harvest Constraints

- This block is located within a mapped Caribou Herd Range. To minimize ground disturbance, winter harvest with frozen snow covered ground conditions. Limit herbicide use. Prescribe road deactivation and visual buffers to minimize potential external pressure on caribou populations. No lichens were found during development. Pockets of subalpine fir regeneration are present; retain all understory regeneration where operationally feasible and safe to do so.
- Harvesting within Areas of Special Concern is scheduled to occur under winter conditions with snowpack to prevent ground disturbance or via reaching in with the machinery and leaving tree stumps intact.
