MINISTRY OF FORESTS

Mature THLB Timber Volume available within 2 hrs drive of the Meziadin Junction (Hwy 37N/37A) within 300m buffer of existing roads.

(Area of interest may include inventories from:
TSA 04, TSA10 , TSA12, TSA 21, TSA43, TFL1, TFL41)

Scale 1: 250,000

0 1.5 3 6 9 12 15 18 21 24 27 30 33 36 39 42 45 Km

Date Produced: Wednesday, August 18, 2010
Map produced by: BCTS Skeena
Geomatics Operator: MHOOLE
Projection: NAD_1983_BC_Environment_Albers, Datum: D_North_American_1983

MXD: TSK_HaulspeedsMeziadinJunction_2hrsBuf300_250.mxd
File: MatureVolWithin2hrsMeziadinJnct_Buf300_20100818_250.pdf

Summary: Mature timber volume (>=80 years) available within 2 hours of the Meziadin Junction from existing road network (timber within THLB and within 300m of existing road)

AOI	Data	Total
TFL1	Sum of TotalVol	94,763
	Average of VPH	409
TSA 12	Sum of TotalVol	1,224,142
	Average of VPH	341
TSA 42	Sum of TotalVol	2,298,963
	Average of VPH	362
TSA 43	Sum of TotalVol	9,182,919
	Average of VPH	305
Total Sum of TotalVol		12,800,787
Total Average of VPH		318

GIS Analysis by: Meg Hoole August 18, 2010
Direction provided by: Mike Folkema

Detail Level = Coarse/Conservative

Datasets:

TFL1_FC: Projected to 2001

TFL41_FC: Projected to 2002

TSA VRI: Projected to 2008

Digital Road Atlas (TSK clip) used as base for Road Network

THLB_TSKdis_ConstraintsErased_20100415: THLB datasets from TFL1, TFL41, TSA10, TSA12, TSA21 merged into one file for analyses). Note: incorporated THLB_TSA10_20100325 acquired via Hubert Burger from TSR3 dataset. Constraints were included for: Goat UWR core, Grizzly WHA polys (including TSA10, & NSSRMP proposed), Coastal Tailed Frog WHA core, OGMA, Private Land, IRs, Nisga'a Treaty Lands, Parks/EcoReserves/ProtectedAreas/Conservancies. Note: Terrain Class 5 has not been removed. More specific details available if required.

Assumptions:

THLB data for TSA 03 (Bulkley) is unavailable until TSR4 is completed - possibly winter 2010/11

Volumes are derived from the clipped FC/VRI polygon attributes.

Road Speeds: Highway = 80kph, All other roads = 30kph.

Assumed that DRA dataset is topologically correct (there may be instances where lines are not snapped together, conversely there may be barriers to some roads which have not been accounted for).

Road status is not accounted for (roads may be deactivated, overgrown, or maintained etc.).

Future roads have not been included, therefore there may be additional volume accessible outside the 300m buffer used, and within 2 hours of the point of delivery.

Road buffer = 300m, used to clip out accessible THLB and FC/VRI.

Volumes tallied for Mature Forest stands only where projected age >=80.

Forested definition used: NonForest_Desc is Null (alpine and np forest are excluded).
