

Old Forest Targets (by Landscape Unit)

This table is provided as information and guidance to licensees for the implementation of the ecological representation objectives in Part 1, section 3 of the Great Bear Rainforest Order. It is not a legal schedule to the Order. The Order includes Schedule G, a legal schedule of long term old forest representation targets and short term minimum old forest retention levels that apply to site series groups for the GBR order area in its entirety. At the landscape unit level, the objectives legally require the retention of a minimum of 30% old forest by landscape unit, with allowances to retain less than 30% old forest subject to specified conditions. The purpose of this non-binding table “Old Forest Targets (by Landscape Unit)” is to provide forest licensees with a suggested set of site series group old forest representation targets and minimum old forest retention levels for each landscape unit to aid in the achievement of the legally specified site series group old forest requirements for the Order area.

OFRT: Old Forest Representation Target (long term)

MOFRL: Minimum Old Forest Retention Level
